RECYCLING OF OLD VEHICLES

It is our duty to protect the environment. Mitsubishi Motors designs and produces high quality vehicles and components aiming to provide our customers with durable motor vehicles, and excellent services to maintain your vehicle in an optimum running condition. We have the highest respect for the environment and use materials which may be recycled and re-used after your Mitsubishi Motors vehicle has come to the end of its economical life. After a long working life we will take your vehicle back and recycle it in an environmentally friendly manner in accordance with the EU Directive on End-of-Life Vehicles and any applicable national statutory provisions.

All Mitsubishi Motors vehicles (up to 3.5t GVM) sold after 1st July 2002, will be taken back free of charge from the last owner, at one of the designated take back points, provided the vehicle contains all major components and is free of waste. From 1st January 2007, this applies to all Mitsubishi Motors vehicles irrespective of the sold date. A network of collection points is available to receive Mitsubishi Motors End-of-Life Vehicles, to ensure your vehicle will be recycled in an environmentally friendly manner. At the same time, the possibilities for the recycling of vehicles and vehicle components are continually being evaluated and improved, aiming to the achievement of even higher recycling percentages in the future.

The European End-of-Life Vehicles Directive and the free take back of End-of-Life Vehicles are applicable in all European Union member states. The transposition of the End-of-Life Vehicles Directive into national law in each member state might not have been completed at the time of putting this publication to print.

Please refer to www.mitsubishi-motors-europe.com and select the web site of the Mitsubishi Motors service network in your country of residence, or call the National Mitsubishi Motors Customer Assistance Centre for further details.

OUSTANDING AFTER SALES FOR CAREFREE MOTORIZATION

Around 2500 Mitsubishi Motors Authorised Service Points in Europe are committed to helping you wherever you are.

PROFESSIONAL SERVICING

Even new cars require regular maintenance and servicing. Not just to guarantee your mobility, but also for the safety of you and your passengers. Trained professionals using specialist diagnostic equipment and original parts at your Mitsubishi Authorised Service Point are ready to oblige. You’ll be advised about the cost beforehand, so there will be no unpleasant surprises when you return to pick up your vehicle.

MITSUBISHI MOTORS GENUINE PARTS

Even the smallest technical faults can lead to accidents. Therefore, all Mitsubishi Motors Genuine Parts have been developed and tested to stringent quality standards. It is recommended to use Mitsubishi Motors Genuine Parts in order to maintain the safety and integrity of your vehicle and that of your passengers. Mitsubishi Motors Genuine Parts are available at all Mitsubishi Authorised Service Points. We are proud to regularly score top in After Sales quality surveys.

10-eng-in 000000 Month, Year Printed in Country
READY FOR ACTION

Bold lines. Flared fenders. A deeply sculpted wedge like an athlete perched to explode from the starting block. The ECLIPSE CROSS leaves onlookers behind to ponder its steeply raked rear window.

Note: Equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.
EXHILARATION AT YOUR COMMAND

The sporty, meticulously crafted cockpit quickens your pulse and heightens your pleasure. Every detail is designed to enhance your awareness and control. So driving feels intuitive with direct, linear response to every command.

Head Up Display (HUD)

The Head Up Display conveys vehicle information in full colour above the meters for easy viewing. You can adjust image brightness and display height to suit your preference and time of day. The container extends or retracts when you turn the ignition.

Note: Equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.
A REFRESHING EXPERIENCE FOR ALL

The joy of driving extends to every passenger in the spacious cabin, which is overflowing with quality materials and solid craftsmanship. Comfortable seats with supportive contours and plenty of legroom keep everyone feeling refreshed even on the longest of journeys.

**SLIDING SEAT 200mm**

The comfortable rear seats with 9-step reclining and 200mm sliding adjustment can be slid all the way back for class-leading legroom. Even then, there is plenty of storage space in back and the 60:40 split seatbacks can be individually lowered for more.

**Rear seat adjustment**

**Slender side sills**

The side sills are slender and protected from thrown up dirt by door garnishes while driving, so anyone can comfortably enter and exit the vehicle without rubbing their legs on the car and getting their clothes dirty.

**Tailgate window**

The rear view is clear through the double rear windows with minimal interference from the height-adjustable rear headrests, which are specially designed to stay low while providing comfortable head support.
WHEN LIFE THROWS YOU A CURVE, STAY IN TOTAL CONTROL.

Challenges arise when you least expect them. Whether navigating winding roads or snowy conditions, S-AWC (Super-All Wheel Control) vehicle dynamics control system supplies optimal drive torque to the rear wheels, as well as optimal drive and brake torque to the left and right front wheels, for incredible stability and control.

5-AWC (Super-All Wheel Control)
Integrated vehicle dynamics control system

S-AWC raises your confidence on any road by combining electronically controlled 4WD with Mitsubishi Motors proprietary Active Yaw Control (AYC), which uses braking to optimally distribute torque to the left and right wheels. Even if you unintentionally brake or accelerate too hard around a snow-covered turn, you can maintain control without extra steering effort because S-AWC detects road conditions on a real-time basis and adjusts braking, as well as coupling in the rear differential, to improve vehicle performance. An indicator in the instrument panel keeps you informed of S-AWC status. You can choose the AUTO, SNOW or GRAVEL drive mode depending on road conditions to enhance turning accuracy, straight-line stability and maneuverability on slippery roads.

- **AUTO mode**: Provides solid 4WD performance in various conditions.
- **SNOW mode**: Enhances stability on slippery road surfaces and is optimized for snow-covered roads.
- **GRAVEL mode**: Delivers excellent driving performance on rough roads and helps prevent you from getting stuck.

Note: Equipment may vary by market. Please consult your local Mitsubishi Motors dealer/distributor for details.
RESPONSIVE ACCELERATION.
MORE POWER FROM EVERY DROP OF FUEL.

1.5L direct-injection turbocharged petrol engine
Downsized for efficiency and turbocharged for powerful torque at low-to-mid rpm, the newly developed engine puts instant acceleration at your command. This highly responsive performance was made possible by direct fuel injection, an exhaust manifold-integrated cylinder head, sodium-filled exhaust valves, MIVEC (Mitsubishi Innovative Valve timing Electronic Control system) and more.

INVECS-III CVT and 6 MT
The advanced CVT supports smooth, powerful acceleration and outstanding fuel efficiency with new step shift control that creates the satisfying sensation of shifting gears. A new lightweight 6-speed manual transmission is also available.

Auto Stop & Go (AS&G)
Auto Stop & Go (AS&G) reduces fuel consumption and CO₂ emissions by automatically shutting off the engine when the vehicle is stationary, such as when waiting at traffic lights. The engine restarts immediately when you remove your foot from the brake pedal (CVT model) or step on the clutch pedal (MT model).
Note: If brake Auto-Hold is active, the engine remains off until the accelerator pedal is pressed.

Make all the right moves in relaxed comfort.
Handling is stable, intuitive and predictable. Where you point, the ECLIPSE CROSS goes with unerring precision and poise thanks to a fine-tuned suspension, responsive steering and supreme body rigidity — reinforced by spot welding, structural adhesives and a standard strut tower bar over the engine. At the same time, all passengers enjoy an extremely comfortable ride on every road wherever you travel.
REASSURING ALL AROUND SAFETY

Advanced safety technology supports safer, more confident driving on the road and in parking lots, day and night. From intelligent sensors that track your surroundings and warn you of danger to active driving assistance and solid passive protection, the ECLIPSE CROSS delivers all around high levels of safety.

**Forward Collision Mitigation System (FCM)**

- Helps prevent a frontal collision or reduce damage if the collision becomes unavoidable. Responds to vehicles and pedestrians via camera and laser radar.
- **Danger of collision**
  - Warning + braking assistance
- **High danger of collision**
  - Warning + strong auto braking
- **Extremely high danger of collision**
  - Braking automatically

**Adaptive Cruise Control (ACC)**

Maintains a selected distance between your vehicle and the car ahead via radar for greater safety and peace of mind. It reduces driver stress especially during traffic jams on highways.

- **No vehicle in front**
- **Vehicle in front**
  - Your selected speed is maintained even if you remove your foot from the accelerator pedal.
  - Your selected distance between vehicles is maintained.
  - When the vehicle in front slow or stops, ACC slows or stops your vehicle.

**Lane Departure Warning (LDW)**

This feature warns and displays a warning if the vehicle drifts from its lane while the turn signals are not operating.

**Automatic High Beam (AHB)**

To increase safety, comfort and driving ease at night, the high beams automatically switch to low beams when vehicles are detected ahead and automatically switch back to high beams so you don’t have to remove your hand from the steering wheel to switch the beams manually.

**Blind Spot Warning (BSW)**

This safety feature uses radar sensors in the rear bumper to detect vehicles in your blind spots, on the driver door mirror when BSW is active and the turn signals are off. When a vehicle is detected while the turn signal is on, an indicator blinks in the corresponding door mirror and a buzzer sounds.

**Rear Cross Traffic Alert (RCTA)**

An indicator appears in the combination meter display when RCTA is active. If radar sensors in the rear bumper detect an approaching vehicle near while reverse gear is engaged, a warning message appears in the Multi-information display, a buzzer sounds and an indicator blinks in both door mirrors.

**Multi Around Monitor**

The views from cameras mounted on the front, rear and sides of the vehicle (including a bird’s-eye view) can be displayed in various combinations to reveal what is in blind spots and help you park more safely. The vehicle on the screen can be displayed in your choice of 7 provided colours.

**Active Stability Control (ASC)**

If wheels lose their grip on slippery surfaces or while turning, ASC automatically adjusts engine output and applies braking force at the appropriate wheels to help maintain control and prevent skidding.

**Hill Start Assist (HSA)**

- **Without HSA Start Assist**
  - When starting on a steep slope, HSA helps prevent you from rolling backwards while you release the brake by maintaining the braking force for up to two seconds until the accelerator is applied.
- **With HSA Start Assist**

**RISE body**

Collision safety performance is significantly enhanced by Mitsubishi Motors RISE (Reduced Impact Safety Evolution) body, which efficiently absorbs energy and maintains high cabin integrity in the event of a collision.

**7 SRS Airbags**

Front airbags, side airbags, curtain airbags and a driver’s knee airbag help protect you and your passengers in the event of a collision.

HUMAN CONNECTIVITY
MADE INTUITIVE ON THE ROAD

SMARTPHONE-LINK DISPLAY AUDIO
Expand your world with smartphone connectivity

Go where you want, when you want. Discover new places and new music. Smartphone-linked Display Audio (SDA) helps you find such moments. You can operate map settings, music playback, and calls all with voice actions for a more enjoyable and safer drive.

Android Auto™
By just connecting your Android™ Smartphone to SDA, you can operate your favorite apps through voice commands, letting you focus on the road for safer driving.

Apple CarPlay
Connecting your iPhone to SDA lets you easily operate maps, music, calls, messages, and more through Siri. SDA helps you intuitively do what you want on your iPhone, even on the road.

Mitsubishi Multi Communication System (MMCS)
This central Wide VGA touch-screen makes navigation easy and keeps you clearly informed of Eco information such as energy consumption and driving range. It also displays the rear camera view whenever you reverse to lend a helping hand.

Rockford Fosgate® premium sound system
Savour the stunning sound quality of a new audio system jointly developed with the Rockford Corporation. Nine speakers surround you with spectacular DTS Neural Surround™ sound.

Touchpad controller
The touchpad controller allows intuitive operation of Smartphone-Linked Display Audio based on the human machine interface concept and is also compatible with Apple CarPlay operation. (Android Auto touchpad controller compatibility not available yet.)

Curser: Flick 1 finger
Select: Press 1 finger
Volume: Flick 2 fingers up/down
Tuner: Flick 2 fingers left/right

Wide VGA display
 Presents information at high resolution for easy reading.

3D map view
Shows 3D polygon landmarks on city maps.

ECO function information
Your Eco score and other information from Eco functions are displayed.

Split display
Simultaneously displays map information, audio information, etc. on the same screen.

Note: The information displayed varies according to the engine type.
Some functions may not be available depending on the smartphone or music player model. Please consult your local Mitsubishi Motors dealer/distributor for details.

Rockford Fosgate®: premium sound system

Key features:
- 36cm soft dome tweeter
- 16cm vacuum forced cone speaker
- 16cm vacuum forced coaxial 2-way speaker
- 29cm dual voice coil subwoofer
- 7.1-ch 8-channel high-power amplifier

USB port
The port is conveniently located near the shift lever, allowing easy access from both front seats.
FEATURE HIGHLIGHTS

Power panoramic sunroof
The stylish twin sunroofs with outer sliding glass open up the atmosphere for the driver and all passengers. Each shade can be separately operated to let in refreshing sunlight.

Heated windshield
Heated wipers throughout the windshield clear the glass of fog or frost to secure forward visibility in less time than by using the heater/defroster.

Heated steering wheel
The heated steering wheel supports more comfortable operation in chilly weather. Its power switch is conveniently located on the centre panel.

Keyless Operation System [KOS]
When carrying the key, you can press a button on the outside of the front doors or tailgate to lock or unlock all the doors and tailgate, and press the engine switch in the cockpit to start or stop the engine.

Heated seat
The driver’s seat, front passenger’s seat and two rear seats provide heaters in the cushions and seatbacks that can be activated or deactivated from easy-to-access switches.

Electric Parking Brake with Brake Auto-Hold
Simply pull the switch up to apply the parking brake or push the switch down to release it. If brake Auto-Hold is activated, the vehicle will remain stationary even if you release the brake pedal. Pressing the accelerator releases the brakes.

Rain sensor
The rain sensor activates the windshield wipers automatically when moisture is detected on the windshield.

Auto headlights
When your surroundings become dark, such as at night or when passing through a tunnel, the headlights automatically activate for your safety and convenience.

Cruise control
Vehicle speed is automatically maintained without keeping your foot on the accelerator pedal, allowing more relaxed driving on extended journeys. Pressing the brake pedal disengages the system.

Tyre Pressure Monitoring System [TPMS]
TPMS employs sensor-transmitters in the wheels to monitor tyre pressure and illuminates a warning lamp on the combination meter cluster if one or more tyres becomes significantly underinflated.

Speed limiter
The speed limiter prevents the vehicle from exceeding the speed you select in most situations. You may need to apply the brakes to prevent the speed from being exceeded when driving downhill. A warning display and an alarm sounds to alert you if the set speed is exceeded.

Colour LCD Multi-information display
The large, 4.2-inch liquid crystal Multi-information display in the centre of the motor panel is extremely easy to read. It keeps you clearly informed of various useful information on vehicle status, your trip, external temperatures, the ECO drive assist system and more.
